

Pooria Namyar

Senior Researcher, Microsoft Research

✉ pooria.namyar@microsoft.com 🌐 [poorianamyar](#) 📄 [Pooria Namyar](#) 🔄 [PooriaNamyar](#)

EDUCATION

Doctor of Philosophy in Electrical and Computer Engineering University of Southern California Advisor: Prof. Ramesh Govindan	Aug 2019 – Aug 2025 Los Angeles, USA
Master of Science in Computer Science University of Southern California	Aug 2019 – Dec 2023 Los Angeles, USA
Bachelor of Science in Electrical Engineering Sharif University of Technology	Sep 2014 – July 2019 Tehran, IRAN

RESEARCH EXPERIENCE

Microsoft Research Senior Researcher	Redmond, WA Sep 2025 – Present
Google Research Intern & Student Researcher	Sunnyvale, CA Sep 2023 – Jan 2025
Microsoft Research Research Intern & Student Contractor	Redmond, WA Jun 2022 – Jan 2023
Microsoft Research Research Intern & Student Contractor	Redmond, WA Jun 2021 – Jan 2022

HONORS & AWARDS

• Google Ph.D. Fellowship in Networking	2024 – 2025
• Selected for NeTS Early Career Investigator Workshop, National Science Foundation	2025
• Machine Learning and Systems Rising Star, MLCommons	2024
• Ming Hsieh Institute (MHI) Scholarship, University of Southern California	2023 – 2024
• 4Y Annenberg Graduate Student Fellowship, University of Southern California	2019 – 2023
• Top 0.1% in Iranian Nation-wide University Entrance Exam for B.Sc.	2014

IMPACT

1. My work, Soroush [6], introduces a general max-min fair allocator that applies to any graph-based resource allocation problem, including traffic engineering and cluster scheduling. Soroush has been deployed in Microsoft and has been managing the traffic across Microsoft's global network since 2023. It has improved the runtime by $3\times$ on average (up to $5.4\times$) without compromising fairness and efficiency. In this work, I designed novel algorithms with provable guarantees to solve multi-path max-min fair allocation using a single fast optimization – achieving this *for the first time* in the networking literature.
2. My work, MetaOpt [7], opens up a new area of research on scalable, general, and user-friendly performance analyzers. MetaOpt enables practitioners to identify and fix the pathological behavior of their algorithms before deployment. It has attracted interest from both academia and industry. For instance, I collaborated with researchers at ETH Zürich to analyze the trade-offs in a new packet scheduling heuristic using MetaOpt [5]. MetaOpt has also identified and fixed inefficiencies in key production heuristics at Microsoft.
3. My work on clock synchronization, Firefly [1], is deployed at Google. I developed a mathematical framework to analyze key properties of clock synchronization systems in data centers. For instance, I proved that running distributed clock consensus on a random overlay graph is scalable, converges quickly, and has a near-optimal error. Firefly combines these analyses with system-level optimizations to achieve ≤ 10 ns error.

[Under Submission/Preparation]

14. Principled and Holistic Performance Analysis of ML-based Systems
Roozbeh Bostandoust, **Pooria Namyar**, Siva Kesava Reddy Kakarla, Ryan Beckett, Santiago Segarra, Eli Cortez, Ankur Mallick, Kevin Hsieh, Rodrigo Fonseca, Mohammad Hajiesmaili, Behnaz Arzani
15. Explanation-Guided Heuristic Design with LLMs
Pantea Karimi, Dany Rouhana, **Pooria Namyar**, Siva Kesava Reddy Kakarla, Venkat Arun, Behnaz Arzani
16. MetaEase: Heuristic Analysis from Source Code via Symbolic-Guided Optimization
Pantea Karimi, Siva Kesava Reddy Kakarla, **Pooria Namyar**, Santiago Segarra, Ryan Beckett, Mohammad Alizadeh, Behnaz Arzani

PATENTS

- Flow Network Intermediate Representation For Optimization Problems, US patent application, Published 6/2025
- Solving Max-min Fair Resource Allocation at Large Scale, US patent application, Published 9/2024
- Network Traffic Control Using Estimated Maximum Gap, US patent application, Published 3/2024
- Impact-Aware Mitigation For Computer Networks, US patent application, Published 3/2023
- Artificial Intelligence Analysis For Holistic System Design, US patent application, under review
- Network Performance Degradation Analyses And Remediation, US patent application, under review
- Explanation-guided Heuristic Design, US patent application, under review

FUNDING

Co-authored the following proposal with Prof. Ramesh Govindan:

- NeTS: Small: A Heuristic Analyzer for Networked Systems, NSF award, *under review*

INVITED TALKS & PRESENTATIONS

Toward Reliable and Scalable Network Algorithms

Microsoft Research, Redmond, WA, USA

Mar 2025

University of Maryland, College Park, MD, USA

Mar 2025

Heuristic Analyzers for Networked Systems

ACM HotNets 2024, Irvine, CA, USA (Ph.D. short talk)

Nov 2024

End-to-End Performance Analysis of Learning-enabled Systems

ACM HotNets 2024, Irvine, CA, USA

Nov 2024

Microsoft Research, Virtual

Nov 2024

Finding Adversarial Inputs for Heuristics using Multi-level Optimization

Rising Stars workshop at NVIDIA, CA, USA

Jul 2024

Google Systems Talk, Sunnyvale, CA, USA (Host: Jeff Mogul)

Jun 2024

NSDI 2024, Santa Clara, CA, USA

Apr 2024

Microsoft Research, Virtual

Apr 2024

Solving Max-Min Fair Resource Allocation at Large Scale

NSDI 2024, Santa Clara, CA, USA

Apr 2024

Microsoft Research, Virtual

Sep 2022

Minding the gap between Fast Heuristics and their Optimal Counterparts

ACM HotNets 2022, Austin, Texas, USA

Nov 2022

Microsoft Research, Virtual

Sep 2022

A Throughput-Centric View of the Performance of Datacenter Topologies

Google Networking Research Summit, Virtual
11th Annual Research Festival, University of Southern California, USA
Microsoft Research, Virtual
ACM SIGCOMM 2021 Conference, Virtual

Mar 2022
Oct 2021
Aug 2021
Aug 2021

TEACHING & MENTORING

Teaching

- Teaching Assistant, Introduction to Internetworking (CSCI 353), Fall 2024, University of Southern California
- Guest Lecturer, Networked Systems in Cloud Computing (CS 599/656), Spring 2024, University of Southern California
- Teaching Assistant, Networked Systems in Cloud Computing (CS 599/656), Spring 2024, University of Southern California
- Teaching Assistant, Data Networks, Fall 2018, Sharif University of Technology
- Teaching Assistant, Introduction to Machine Learning, Fall 2018, Sharif University of Technology
- Teaching Assistant, EE Principles Laboratory, Fall 2016, Sharif University of Technology

Mentoring

- Arvin Ghavidel (PhD), University of Southern California Fall 2022 – Present
- Roozbeh Bostandoost (PhD), University of Massachusetts Amherst Spring 2024 – Present
- Pantea Karimi (PhD), Massachusetts Institute of Technology Fall 2024 – Present
- Neal Sharma (BS), University of California, Berkeley Fall 2022 – Summer 2023
- Smit Kadvani (MS), University of Southern California Fall 2021

PROFESSIONAL SERVICE

Service

- Program Committee: CoNEXT 2026
- Pre-Review Task Force: NSDI 2025
- AE Reviewer: ACM SIGCOMM 2024, ACM SOSP 2023, ACM SIGCOMM 2023
- Reviewer: IEEE SPAWC 2024
- External Reviewer: NSDI 2022, ESA 2025

Outreach

- Viterbi Graduate Mentor, University of Southern California, 2024 – 2025
- Volunteer in [CS@SC Coding Camps](#), Viterbi K-12 STEM Center, 2024
- Panelist, Sharing PhD journey with Undergraduate Students, University of Southern California, 2024
- Womxn in Engineering (WIE) mentor, University of Southern California, 2023 – 2024
- Organizer, MHI Annual Research Festival, 2023

MEDIA COVERAGE
